REPORT

Learning from mistakes

TEAM: *The Inventors*

Stanislav Valkanov

Simeon Shopkin

Technological school electronic systems associated with technical university of Sofia

Most common problems in last exam:

- One common problem is that the output CSV file name of the program is incorrect. In most cases the output CSV file is named "results.csv" instead of "result.csv".
- Also mistake is that most students are missing a checking statement for correct file name format .
- For some students naming their source code is also big problem
- Problem is that programs just doesn't follow the description of task

We give point for:

- 1 point if program code is "clean"
- 1 point if the task is correctly understood
- 1 point if it works with right named files
- 1 point if it works with no matter how are named files
- 1 point if it works with simple change

Why we do that?

We do all this in order to improve our knowledge of Ruby and to make possible our further development with Ruby.

Our score table is:

NAME	SCORE
Dimitar Nestorov	3
Lubomir Yankov	1
Tihomir Lidanski	0
Kalin Marinov	3
Stanislav Gospodinov	5
Borislav Rusinov	3
Veselin Dechev	1
Momchil Angelov	2
Dimitar Terziev	4
Stanislav Valkanov	3
Denis Trenchev	1
Marian Belchev	3
Ivelin Slavchev	3
Petko Bozhinov	4
Nikola Marinov	1
Radoslav Kostadinov	3
Ivo Valchev	4
Kristina_Pironkova	3
Simeon Shopkin	2

NAME	SCORE
Stanislav Iliev	1
Iliyan Germanov	4
Stefan Iliev	3
Nikolay Mihailov	1
Borislav Stratev	1
Lili Kokalova	3
David Georgiev	2
Valentin Varbanov	4
Vladimir Yordanov	3
Veselina Kolova	1
